Digital Signal Processing Laboratory Lab 5 Exercises

- 1. We have an electroencephalography (EEG) measured data file "lab5.eeg" in the binary format. Please write a MATLAB program to complete the following tasks.
 - (a) Load the EEG dataset into a MATLAB array from "lab5.eeg".
 - (b) Use "subplot" function to plot the EEG waveforms of the 1st, 3rd, and 5th channels in a single figure.
 - (c) Save the above 3-channel EEG data into a single data file in ASCII format.

[Hint: data and header files can be downloaded from the moodle learning system.]

報告繳交注意事項:

- 1. 報告中請標示學號與姓名,並將檔名改為學號_姓名(ex. B11102200_陳XX)。
- 2. 撰寫報告方式:(1)使用 MATLAB Live Script 撰寫程式,須執行結果,並輸出成 pdf 檔, 上傳至 moodle 系統。(2)使用 m 檔撰寫程式,請將程式碼與執行結果截圖,複製貼上於 word 中,並轉成 pdf 檔案,上傳至 moodle 系統。
- 3. 評分標準:
 - (1)實驗課當天(TUE)繳交:85±10 分
 - (2)遲1天(WED)繳交遲交:75±10分
 - (3)遲2天(THU)繳交遲交:65±10分
 - (4)其他時間繳交者:0分
 - (5)有繳交報告,但未轉成 pdf 檔上傳者,一律給 0分。
